

SYLLABUS

1. Data about the program of study

| | |
|--------------------------------------|---|
| 1.1 Institution | Technical University of Cluj-Napoca |
| 1.2 Faculty | Faculty of Electronics, Telecommunications and information Technology |
| 1.3 Department | Communications |
| 1.4 Field of study | Electronic Engineering, Telecommunications and Information Technologies |
| 1.5 Cycle of study | Bachelor of Science |
| 1.6 Program of study / Qualification | Telecommunications Technologies and Systems, Applied Electronics / Engineer |
| 1.7 Form of education | Full time |
| 1.8 Subject code | TST-E24.00, EA-E24.00 |

2. Data about the subject

| | | | | | | | |
|---|---|--------------|---|----------------|------|----------------------|--------|
| 2.1 Subject name | Microwaves | | | | | | |
| 2.2 Subject area | Electronics and Telecommunications Engineering | | | | | | |
| 2.3 Course responsible | Assist. Prof. Andra PASTRAV, PhD Andra.Pastrav@com.utcluj.ro | | | | | | |
| 2.4 Teacher in charge with seminar / laboratory / project | Assist. Prof. Andra PASTRAV, PhD Andra.Pastrav@com.utcluj.ro | | | | | | |
| 2.5 Year of study | 2 | 2.6 Semester | 2 | 2.7 Assessment | Exam | 2.8 Subject category | DD/ DI |

3. Estimated total time

| | | | | | | |
|---|-----|-----------|------------|----|--------------------------|-------|
| 3.1 Number of hours per week | 4 | of which: | 3.2 course | 2 | 3.3 seminar / laboratory | 2 |
| 3.4 Total hours in the curriculum | 56 | of which: | 3.5 course | 28 | 3.6 seminar / laboratory | 28 |
| Distribution of time | | | | | | hours |
| Manual, lecture material and notes, bibliography | | | | | | 25 |
| Supplementary study in the library, online specialized platforms and in the field | | | | | | - |
| Preparation for seminars / laboratories, homework, reports, portfolios and essays | | | | | | 10 |
| Tutoring | | | | | | 3 |
| Exams and tests | | | | | | 6 |
| Other activities: | | | | | | - |
| 3.7 Total hours of individual study | 44 | | | | | |
| 3.8 Total hours per semester | 100 | | | | | |
| 3.9 Number of credit points | 4 | | | | | |

4. Pre-requisites (where appropriate)

| | |
|----------------|---|
| 4.1 curriculum | Fundamentals of Electrotechnics, Passive Electronic Components and Circuits, Fundamental Electronic Circuits, Digital Integrated Circuits, Signals Theory |
| 4.2 competence | No |

5. Requirements (where appropriate)

| | |
|---|--|
| 5.1. for the course | Video-projector, screen, whiteboard / blackboard |
| 5.2. for the seminars / laboratories / projects | PCs with Internet access |

6. Specific competences

| | |
|--------------------------|---|
| Professional competences | C1. To use the fundamental elements regarding electronic devices, circuits, systems, instrumentation, and technology C2. To apply basic methods for signal acquisition and processing C5. To select, install, configure and exploit fixed and mobile telecommunications equipment. To equip a site with common telecommunications networks. C6. To solve wide-band telecommunications networks' specific problems: propagation in various transmission media, high frequency circuits and equipment (microwaves and optical). |
| Cross competences | N.A. |

7. Discipline objectives (as results from the key competences gained)

| | |
|-------------------------|--|
| 7.1 General objective | Developing the competences regarding the use, analysis and (re)design of fundamental microwave circuits. |
| 7.2 Specific objectives | <ol style="list-style-type: none"> 1. Improve their understanding of wave propagation on transmission lines and expand it to include stripline and microstrip structures, as well as waveguides of rectangular and circular cross section. 2. Learn to analyze the network behavior of multiport microwave systems. 3. Be able to design impedance matching networks. 4. Be able to analyze and design passive microwave components, including microwave resonators, power dividers, hybrid junctions, and microwave filters. 5. The students will, through labs, develop an intuition and physical feeling for microwave phenomenon and get first hands-on experience with microwave components and their characterization techniques. |

8. Contents

| 8.1 Lecture (syllabus) | Teaching methods | Notes |
|--|--|---|
| <ol style="list-style-type: none"> 1. Introduction. Microwaves applications. Recap of basic concepts that are needed for the study of Microwaves. 2. Transmission Line Theory. Field Analysis on Transmission Lines 3. Transmission Lines and Waveguides. General Solutions for TEM, TM and TE Waves 4. Rectangular Waveguide. TE and TM Modes 5. Coaxial Line. TEM Modes and Higher-Order Modes 6. Stripline and Microstrip 7. Impedance Matching and Tuning. Matching with Lumped Elements (L Network). The Quarter-Wave Transformer 8. Microwave Resonators 9. The S-matrix, Power Dividers and Directional Couplers | Presentation, heuristic conversation, exemplification, problem presentation, teaching exercise, case study, formative evaluation | Use of .ppt presentation, projector, blackboard |

| | | | |
|---|---|---|--|
| 10. Waveguide Directional Couplers. Coupled Line Directional Couplers | | | |
| 11. Noise in Microwave Circuits. Diodes, Transistors, Integrated Circuits. | | | |
| 12. Microwave Amplifiers | | | |
| 13. Microwave Oscillators, Detectors and Mixers | | | |
| 14. Microwaves applications | | | |
| Bibliography | | | |
| 1. Palade, T. – Tehnica Microundelor, Genesis, Cluj-Napoca, 1997, ISBN 973-98204-3-3 | | | |
| 2. D. Pozar – Microwave Engineering, 4th Edition, John Wiley & Sons, 2012. ISBN: 978-0-470-63155-3 | | | |
| 3. Nicolau, Ed.-Manualul inginerului electronist–Radiotehnica I, II, III-Ed.Teh 288, ISBN973-31-0116-8 | | | |
| 4. Palade, T. – Tehnica Microundelor. Culegere de probleme, UTC-N, 1992. | | | |
| 5. Baican, R. – Circuite integrate de microunde – Promedia Plus, Cluj, 1998, ISBN 973-97377-6-5 | | | |
| 8.2 Seminar / laboratory / project | Teaching methods | Notes | |
| 1. Laboratory Work Regulations. Infrastructure Presentation. Software Tool for Wave Propagation Simulation Mefisto-2D | Didactic and experimental proof, didactic exercise, teamwork. | Use of laboratory instrumentation, experimental boards, computers, magnetic board | |
| 2. Wave Propagation on TEM Transmission Lines | | | |
| 3. Microwave Propagation Along Rectangular Waveguides | | | |
| 4. High-Order Propagation Modes Analysis in Rectangular Waveguides | | | |
| 5. The Smith Chart | | | |
| 6. Microstrip Lines | | | |
| 7. Impedance Matching | | | |
| 8. Power and Attenuation Measurements | | | |
| 9. Directional Couplers, Power Dividers and Hybrid Junctions | | | |
| 10. Microwave Antennas – Parabolic Dish | | | |
| 11. Microwave Antennas - Horn Antenna | | | |
| 12. Microwave Link Budget | | | |
| 13. Industrial Applications of the Magnetron. Microwave Oven | | | |
| 14. Make-up missed laboratory activities | | | |
| Bibliography | | | |
| 1. Palade, T. – Tehnica Microundelor, Genesis, Cluj-Napoca, 1997, ISBN 973-98204-3-3 | | | |
| 2. D. Pozar – Microwave Engineering, 4th Edition, John Wiley & Sons, 2012. ISBN: 978-0-470-63155-3 | | | |

| 4. N. Crișan, L. Cremene, T. Palade, E. Pușchiță, Microunde – Aplicații (Microwave – Applications), Volumul 1, U.T. Press, 2008 | | | |
| 5. T. Palade, A. Moldovan, E. Pușchiță, I. Vermeșan, R. Coldă, Microunde – Aplicații (Microwave – Applications), Volumul 2, U. T. Press, 2009 | | | |

9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

The discipline content and the acquired skills are in agreement with the expectations of the professional organizations and the employers in the field, where the students carry out the internship stages and/or occupy a job (in the field of Electronics Engineering; Telecommunications Engineering; Electronics Design Engineering; System and Computer Design Engineering; Communications Design Engineering, Communications Systems Test Engineer), and the expectations of the national organization for quality assurance (ARACIS).

10. Evaluation

| Activity type | 10.1 Assessment criteria | 10.2 Assessment methods | 10.3 Weight in the final grade |
|-----------------------------|--|---|--|
| 10.4 Course | The level of acquired theoretical knowledge and practical skills | Summative evaluation written exam (theory and problems) | 50 % (theory accounts for 25%, problem solving accounts for 25%) |
| 10.5 Seminar/ Laboratory | The level of acquired knowledge and abilities | Continuous formative evaluation – 3 tests: - practical lab test - problem solving tests | 50 % (average of the 3 lab tests) |

10.6 Minimum standard of performance

Qualitative:

Knowledge:

- ✓ Basic knowledge of wave propagation on transmission lines, stripline and microstrip structures, as well as waveguides of rectangular and circular cross section.
- ✓ Basic knowledge of impedance matching techniques.
- ✓ Basic knowledge regarding the design, role, and working principle of power dividers, directional couplers, passive and active microwave components.
- ✓ Main microwave applications.

Competences:

- ✓ Expand transmission line theory knowledge to include stripline and microstrip structures, as well as waveguides of rectangular and circular cross section.
- ✓ Analyze the network behavior of multiport microwave systems.
- ✓ Design impedance matching networks.
- ✓ Describe the role, functionalities and design of main passive and active microwave components.
- ✓ Analyze the link budget.

Quantitative:

- ✓ Complete the tasks for all laboratory activities
- ✓ Minimum 5 points (out of 10) for the laboratory evaluation (Lab_evaluation), minimum 5 points (out of 10) for the theoretical part of the Final Exam (Exam_Theory), and minimum 5 points (out of 10) for the problem-solving part of the Final Exam (Exam_Problems).
- ✓ The final score is: $0,5 * \text{Lab_evaluation} + 0,25 * \text{Exam_Theory} + 0,25 * \text{Exam_Problems}$
