

SYLLABUS

1. Data about the program of study

| | |
|--------------------------------------|--|
| 1.1 Institution | Technical University of Cluj-Napoca |
| 1.2 Faculty | Faculty of Electronics, Telecommunications and information Technology |
| 1.3 Department | Communications |
| 1.4 Field of study | Electronic Engineering, Telecommunications and Information Technologies |
| 1.5 Cycle of study | Bachelor of Science |
| 1.6 Program of study / Qualification | Telecommunications Technologies and Systems/ Engineer Applied Electronics/Engineer |
| 1.7 Form of education | Full time |
| 1.8 Subject code | TST-E37.00/EA-E37.00 |

2. Data about the subject

| | | | | | | | |
|---|---|--------------|---|----------------|---|----------------------|-------|
| 2.1 Subject name | Microprocessors based systems | | | | | | |
| 2.2 Subject area | Theoretical area Methodological area Analytic area | | | | | | |
| 2.3 Course responsible | Professor Eugen LUPU, Ph.D. - eugen.lupu@com.utcluj.ro | | | | | | |
| 2.4 Teacher in charge with seminar / laboratory / project | Assoc. Prof. Anca APATEAN, Ph.D. - anca.apatean@com.utcluj.ro | | | | | | |
| 2.5 Year of study | III | 2.6 Semester | 6 | 2.7 Assessment | E | 2.8 Subject category | DD/DI |

3. Estimated total time

| | | | | | |
|---|-----|----------------------|----|--------------------------|-------|
| 3.1 Number of hours per week | 4 | of which: 3.2 course | 2 | 3.3 seminar / laboratory | 2 |
| 3.4 To Total hours in the curriculum | 56 | of which: 3.5 course | 28 | 3.6 seminar / laboratory | 28 |
| Distribution of time | | | | | hours |
| Manual, lecture material and notes, bibliography | | | | | 14 |
| Supplementary study in the library, online specialized platforms and in the field | | | | | 10 |
| Preparation for seminars / laboratories, homework, reports, portfolios and essays | | | | | 14 |
| Tutoring | | | | | 3 |
| Exams and tests | | | | | 3 |
| Other activities: | | | | | |
| 3.7 Total hours of individual study | 44 | | | | |
| 3.8 Total hours per semester | 100 | | | | |
| 3.9 Number of credit points | 4 | | | | |

4. Pre-requisites (where appropriate)

| | |
|----------------|--|
| 4.1 curriculum | Basics on computers and microprocessors, digital integrated circuits, Boolean algebra, digital integrated circuit design, synthesis of logic functions |
| 4.2 competence | programming skills: x86 assembly language, C |

5. Requirements (where appropriate)

| | |
|---|-------------|
| 5.1. for the course | Cluj-Napoca |
| 5.2. for the seminars / laboratories / projects | Cluj-Napoca |

6. Specific competences

| | |
|---------------------------------|---|
| Professional competences | <p>C3. Application of the basic knowledge, concepts and methods regarding the architecture of computer systems, microprocessors, microcontrollers, languages and programming techniques</p> <p>C4. Design, implementation and operation of data, voice, video and multimedia services. This is based on the understanding and the application of fundamental concepts in telecommunications and transmission of information</p> <p>C5. Selecting, installing, configuring and operating fixed or mobile telecommunications equipment. Equipping a site with usual telecommunications networks</p> |
| Transversal competences | N/A |

7. Discipline objectives (as results from the key competences gained)

| | |
|-------------------------|--|
| 7.1 General objective | Developing the competences regarding the use of microprocessors, microcontrollers and interfaces in microsystems and computers |
| 7.2 Specific objectives | <ol style="list-style-type: none"> 1. Understanding of main architectures in data processing 2. Understanding basic microprocessors concepts and programming using Intel x86 as reference 3. Interfaces, buses and programmable devices study and use 4. To assess the requirements of a microprocessor / microcontroller for a specific application 5. To develop applications using PC resources and ESP8266 microcontrollers |

8. Contents

| 8.1 Lecture (syllabus) | Teaching methods | Notes |
|---|---|---|
| <p>Course description. Evaluation mode.</p> <p>1. Pentium Processors. Architecture. Registers. Pipeline. Cache memory. Floating Point Unit. Branch prediction. New generation of Pentium. Multicore architectures.</p> <p>2. PC memory. The memory map (main memory, video, UMA, HMA). Memory extended and expanded. Virtual memory. Connecting additional memory to the PC memory map.</p> <p>3. Memory Hierarchy in terms of technology. The cache role. The basic models of the cache. Cache Memory Architectures. The Pentium cache.</p> <p>4. The 80x86 programmable interfaces family. Presentation of the timer I8254. Architecture. Pins and signals. The timer programming. Employment of the timer in the PC. Examples of use.</p> <p>5. Classification of interrupts. PIC I8259A circuit architecture. PIC pins and signals. Programming of the PIC. Interrupts assignment</p> | <p>Presentation, heuristic conversation, exemplification, problem presentation, teaching exercise, case study, formative evaluation</p> | <p>Use of .pptx presentation, projector, blackboard</p> |

| | | |
|--|---|---|
| in PC. | | |
| 6. Direct memory access basics. The DMA controller I8237A. The internal architecture. Pins and signals. I8237A programming. | | |
| 7. Serial Communications RS232. UART/USART. The I16550 device architecture. Programming. Applications. | | |
| 8. Serial interfaces. I2C, SPI, I2S Use and applications. | | |
| 9. Buses in the PC (ISA, PCI, AGP). ISA bus signals. Development of the ISA bus compliant cards. | | |
| 10. PCI Bus overview. Architecture and signals. Transfer modes | | |
| 11. PCI express overview. PCI Express bus topology, architecture, layers, transactions. | | |
| 12. USB Bus overview. USB On the Go. USB 3.0. | | |
| 13. ESP8266 microcontroller. Architecture. | | |
| 14. Applications. Review-exam topics. | | |
| References. | | |

| 8. Lecture Slides : http://elupu.utcluj.ro/ | | |
| 8.2 Laboratory | Teaching methods | Notes |
| 1. Introduction. Laboratory Objectives topic. | Didactic and experimental proof, didactic exercise, team work | Use of laboratory instrumentation, experimental boards, computers, magnetic board |
| 2. Identifying processors in PCs. Microprocessors resources determination employing CPUID instruction. | | |
| 3. The Cache memory. Application using CPUID instruction. | | |
| 4. The timer circuit 8254. Applications. Audio signals generation. | | |
| 5. Programmable Interrupt Controller -I8259A. Applications. | | |
| 6. 8237A DMA controller programming. DMA data transfer to PC in the video memory. | | |
| 7. The UART 16650 interface. Serial communication applications. | | |
| 8. LCD interfacing on SPP. | | |
| 9. USB Bus. Design USB devices using USB-serial converters FT232. | | |
| 10. Basic applications on ESP8266 platform. Arduino IDE. | | |
| 11. ADC applications on ESP8266 board. | | |
| 12. SPI interface on ESP8266 board. | | |
| 13. I2C application on ESP8266. | | |
| 14. Lab. recovery and laboratory activity evaluation | | |

9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

The discipline content and the acquired skills are in agreement with the expectations of the professional Competences acquired will be used in the following COR occupations (Electronics Engineer; Telecommunications Engineer; Electronics Design Engineer; System and Computer Design Engineer; Communications Design Engineer) or in the new occupations proposed to be included in COR (Sale Support Engineer; Multimedia Applications Developer; Network Engineer; Communications Systems Test Engineer; Project Manager; Traffic Engineer; Communications Systems Consultant).

10. Evaluation

| Activity type | 10.1 Assessment criteria | 10.2 Assessment methods | 10.3 Weight in the final grade |
|---|--|---------------------------------|--------------------------------|
| 10.4 Course | The level of acquired theoretical knowledge and practical skills | Written exam (theory+ problems) | 65% |
| 10.5 Laboratory | The level of acquired knowledge and abilities | Laboratory tests (3-4) | 35% |
| 10.6 Minimum standard of performance | | | |
| <p>Qualitative level: <i>Minimal knowledges:</i></p> <ul style="list-style-type: none"> ✓ Knowledge of Intel processors architecture ✓ Knowledge of main interfaces employed in PC. ✓ Knowledge of main buses in PC. <p><i>Minimal competences:</i></p> <ul style="list-style-type: none"> ✓ To know the main architectural elements of Microprocessors ✓ To be able to program the main interfaces employed in PC ✓ To know to use the Arduino IDE tool <p>Quantitative level:</p> <ul style="list-style-type: none"> ✓ Perform all laboratory work ✓ The exam and laboratory notes must be at least 5. ✓ The mark for the subject is calculated with the relation: $0.65 * \text{Exam score} + 0.35 * \text{Labs score}$ | | | |

| Data of filling in: | Responsible | Title First name SURNAME | Signature |
|---------------------|--------------|----------------------------------|-----------|
| 29.09.2020 | Course | Professor Eugen LUPU, Ph.D. | |
| | Applications | Assoc. Prof. Anca APATEAN, Ph.D. | |
